

## **Free Flight Supplies Newsletter No.74**

This newsletter replaces No.73 on the web site. The list is being developed and the gaps are being filled in. Some new product ideas are being developed (slowly!), but it all takes time. The tidying and sorting of the range continues. My idea now is to try to deepen the range rather than expand into new areas. I will also take any opportunities that come my way to improve the range of items.

### **SITE UPDATE**

**14<sup>th</sup> February 2015**

### **HARD COPY PRICE LIST AND CATALOGUE**

**Number 86 February 2015**

### **CHANGES**

1939 KORDA complete nose unit £32.00 propeller only £29.00

BLACKPOOL ROCK complete nose unit £24.00 propeller only £20.00

### **FUTURE PRODUCTS**

1. **There are various ideas in the pipeline that are being developed: -**

The state of play the progress (if any!) is noted! Very little in fact has happened the effort of keeping the ship as it exists on the road takes all the time that is available.

New Polish timers have been specified and prototypes are awaited. My producer is getting down to the new ideas and more prototypes are due very soon. Currently he has problems keeping up with demands for the existing range. A new design for a three-function flat scroll timer is being developed. A new lighter weight Tomy timer is also being tested. Now I have the combined squeeze off and DT I'm looking at a valve shut off operating on the same basis. A silicon damper is being progressed based upon the Cheepo timer.

More data charts. When I get around to writing them up.

The "how to do it" publications. Other ideas based upon my experiences and your questions are being written up.

## **SALES AT FORTHCOMING CONTESTS/EVENTS AND OTHER ACTIVITIES**

If you want me to bring something in particular to a meeting please advise in good time! I have added a page to the web site that details local free flight activities. I get to most of these events. If you order something do remember to turn up and collect! OK? You can get added to the distribution of the activities list if you so desire, just e-mail me <mike@freeflightsupplies.co.uk>

The on-going state of local activity can be viewed.
